### ***Drawings***

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the originally filed drawings are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: applicant has amended claim 32 to clearly recite a product-by-process format in claiming the particular catheter and electrode device. With regard to the product-by-process, the process is deemed to impart distinctive structural limitations to the catheter device which would not be fairly taught by the prior art. In particular, the steps of immersing the electrode in a solution and applying an electric field to the solution yields an electrode having microscopic abrasions of a particular size not fairly taught in the art, these abrasions resulting in a reduced number of "electrical interference centers" to thereby yield for more efficacious delivery of RF energy during use.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
